

SYNEX DATA provides

Systems for Next Generation Data

"Let our veteran team of contract experts help you with all your government and state needs."

Executive Summary

SYNEX DATA is a Service-Disabled Veteran Owned Business providing comprehensive, multi-disciplinary solutions across all federal, state, and private sectors. While anchored by elite information technology and cybersecurity expertise, we serve as a single-source prime contractor capable of fulfilling specialized requests and general procurement needs across the full spectrum of government operations.

Mission Statement

Our mission: We will constantly strive to be the federal government's primary, veteran-led partner for all contracting and procurement needs. We provide elite solutions across physical and digital landscapes, integrating comprehensive general contracting with high-level information technology and cybersecurity, delivering every requirement with military precision and integrity.

Core Competencies

- Information Technology: Managed services, infrastructure, and cloud integration.
- Cybersecurity: Risk mitigation, compliance, and threat protection.
- Specialized Procurement: Rapid response to "specialized" state and federal requests.
- Logistics & Project Management: End-to-end oversight of complex, multi-agency contracts.
- General Contracting: Fulfillment of diverse operational requirements across various NAICS sectors.

Differentiators

Our integrated security and systems reduces risk, breaches, and operational disruption.

Our veteran team of government and state contract experts provide elite customer service.

Testimonials

"Before using SYNEX DATA, I was facing security breaches and an outdated approach to securing our network and data. In just three weeks of hiring SYNEX DATA, I noticed better network resiliency performance and we have not had a single breach since. Their client needs focused approach is what set them apart from our other bids received. I highly recommend SYNEX DATA to any government or state agency looking to secure their network."

Anthony Remillard, CEO of Acupet Veterinary Care

Past Performance

- Cybersecurity & Risk Management - NAICS 541519, Conducted Vulnerability Assessments and Penetration Testing for a financial institution. Implemented MFA across 500+ users to achieve SOC 2 Compliance.
- Cloud Migration - NAICS 518210, Migrated legacy database to a Secure AWS Government Cloud environment resulting in 25% reduction in annual hosting costs.
- References available on request

Leadership

We are a veteran-owned and operated firm built on the core values of discipline, integrity, and mission-first execution learned through our military service.
